The quality of water and soil in Portland-area rivers is important to me. Based on info provided, I have some unanswered question such as how the project is paid for and what impact the construction project will have on the use of the river and Portland streets. Given all that, I would support the plan that accomplishes the maximum level of risk reduction (except for plan H).

Also, it would be nice to have more monitoring of inland Oregon beaches, like Broughton Beach which I use, beyond just E. coli levels.

Thank you!
